

M Bhubaneswari- DELL

Q: Are you satisfied with the company you are placed in or you expected a better company?

A: Of course I am. I had never made up my mind for any specific company because I wanted to maintain the flexibility for any fine company. And cracking the very first super dream company was all I could have asked for.

Q: Were there any challenges that you faced in the beginning of the placement season?

A: Well DELL was the first company visiting the campus for recruitment , So luckily I didn't have to experience any kind of placement related challenges.

Q: Were you rejected by any other company? If yes, what could be the possible reasons?

A: Got it in the first go, so no I wasn't. But I still remember the MS internship last year. I couldn't even clear the first round .My lack of preparation must have been the reason.

Q: How many levels were there in the selections procedure of this company?

A: There were a total of three rounds.

- First was the regular written round which majorly included questions on Aptitude, Operating System, C, DBMS, Computer Networks, C++/Java.

- Second round was the technical interview round. I was asked questions on aptitude, Presence of mind, C, C++, Data structures, Dbms and some logical questions. They were particularly interested in my DBMS project that I have done in the 4th semester.
- Third was the HR interview .I was asked about my family, interest etc.

Q: What preparations did you make to get through the written rounds?

A: For the written round I had started practicing quantitative aptitude and verbal reasoning from May. To check on the time constraint I would also solve tests online. And regarding the technical questions a clear concept on the subjects was enough to solve them.

Q: What preparations did you make to get through the GD rounds?

A: Actually ,The truth is I didn't prepare myself for the interview rounds at all but was confident about the thought behind was I wanted to stay as genuine as possible. And that turned out to be a very strong point. About the technical questions, a clear knowledge of subjects helped. If I didn't know the answer I clearly said it to them, and they would continue with another question. And regarding the non-technical questions, I answered what got to my mind then.

Q: Any tips or suggestions for the juniors?

A: Be confident and genuine. This is what will make all the difference.

Q: Can you briefly explain your overall experience of the placement season?

A: With a light heart I am yet to see my friends getting placed, as the placement season has just begun.
